Education

Methodist College of Engineering and Technology

Hyderabad, Telangana

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.5/10

Aug 2023 – May 2027

Experience

AI/ML Co-Lead

Oct 2025 – Present

Google Developer Groups on Campus (GDGC), MCET

Hyderabad, Telangana

- Leading AI/ML initiatives and organizing technical workshops for 100+ students to enhance understanding of machine learning and artificial intelligence technologies
- Mentoring students in AI/ML concepts, prompt engineering, and agentic AI while fostering collaborative learning

Cisco Virtual Internship Programme (VIP) 2025

Jan 2025 – Feb 2025

Cisco Networking Academy

Remote

- Simulated complete campus network using Cisco Packet Tracer with 5-block hierarchical design including core, distribution, and access layers
- Conducted comprehensive attack surface analysis, identified network vulnerabilities, and proposed risk-based countermeasures including VLAN segmentation and ACL implementation
- Designed secure hybrid access model with VPN integration for faculty remote access while maintaining network security

Projects

DonorSync | *React, Next.js, Supabase, Bootstrap*

2024

- Developed full-stack blood bank management web application submitted to Google Solution Challenge 2025
- Streamlined donor-hospital connectivity and improved donor-recipient matching efficiency with real-time database integration

Hybrid AI Medical Diagnostic System | *Python, RAG (Vector Search), Gemini API, Streamlit*

2024

- Engineered a 3-Layer Hybrid Inference Engine combining deterministic logic, RAG, and Gemini LLM to diagnose 21+ distinct medical conditions, effectively eliminating hallucinations for all rule-mapped scenarios
- Optimized Critical Triage Performance by implementing a local rule-based layer that flags 6+ high-priority emergencies (e.g., Heart Attack, Pneumonia) in <50ms, removing dependency on external APIs for life-critical decisions
- Built a Semantic Search (RAG) Pipeline to index medical knowledge, enabling the system to handle 100% of complex queries with grounded, context-aware responses when standard rule-matching fails

Smart Irrigation System | *NodeMCU, IoT, C++*

2024

- Developed IoT-based automated irrigation system with real-time soil moisture monitoring, reducing water usage by 25%

Technical Skills

Languages: Python, C, Java, Kotlin, SQL, JavaScript, HTML, CSS

Frameworks & Tools: React, Next.js, Node.js, Streamlit, Bootstrap, n8n, Zapier, Git, VS Code, Figma, Adobe Photoshop

Cloud & AI/ML: Google Cloud Platform, GPT-4, Gemini, LangChain, Generative AI, Agentic AI

Networking & Security: Cisco Packet Tracer, VLAN Configuration, ACLs, Network Segmentation, CCNA, Cybersecurity

Specializations: Full-Stack Development, IoT Development, AI Automation, Workflow Automation, Network Architecture

Certifications

Cisco: CCNA (Introduction to Networks), Introduction to IoT

Google Cloud: Introduction to Generative AI, Develop GenAI Apps with Gemini and Streamlit, AI Essentials

Google (Coursera): Foundations of Cybersecurity, Cybersecurity Risk Management, SIEM Tools

NPTEL (IIT Kharagpur): Java Programming
